

## Plastic Filter Housing

IFAB's plastic housings are known for high quality, performance and economy. They are easy to use and are available in a variety of materials and sizes, in order to fit as many applications.

Plastic filter housings have been designed for use in a wide range of liquid applications. Most standard industrial disposable filter elements will fit this attractive range of filter housings, which include versions in polypropylene with clear or opaque bowls. All housings will accept the industry standard Double Open End range of cartridges. Each of these models can be supplied with optional extras such as mounting brackets and releasing spanners.

### Key Product Features

- Choice of clear or opaque bowls for all 5, 10 and 20" versions
- Wide chemical compatibility using PP, ABS, Polycarbonate, Polyamide and AS materials of construction
- Polyamide version suitable for use in temperatures up to 73°C
- Push button pressure and air release available on most models
- Robust and rugged designs suitable for most industrial applications

High quality and big variety
