

## Cartridge Filter Housing

### 112 Design

The 112 design is a free standing housing that suits most pre-filtration applications.

The housing is available with multiple amount of cartridges (3-18 pcs) up to 40" long. The top opening style is equipped with a Cast Vee clamp as standard for pressures up to 10 bar.

These housings are widely used where low capital cost is of prime importance. Being floor mounted and therefore free standing, these housings will suit most pre-filtration applications. Bolted closures are an option available for all models.

The 112 design will accept either standard Double Open End or Single Open End cartridges. This includes the full range of IFAB and industry standard cartridges ranging from 0.1 to 500µm with nominal lengths of 10, 20, 30 and 40".

### Key Product Features

- Universal cup allows the use of plug in (Code 3 and Code 8) or DOE cartridge styles in the same housing
- Vee clamp closures use unique 'W' style seal for reliable leak free operation
- High quality cast Vee band clamps for safety and security
- Cast compression nut with integral PTFE washer for easy, hand tight cartridge sealing
- Wide range of connection sizes and types, cartridge lengths and materials of construction
- WRAS Approved product

Free standing, easy to install
