

Cartridge Filter Housing

114 Design

The 114 design is a leg mounted, free standing housing with split shell design.

The housing is available with multiple amount of cartridges up to 40" of length. The centre positioned, split shell opening style is equipped with a Cast Vee clamp as standard for liquid pressures ranging from 7 - 10 bar. Equipped with the inverted dished end, this free standing housing with split shell design is the ideal choice when using Single Open End plug in style cartridges.

The simple to lift off lightweight dome allows full and easy access to the cartridges for rapid changeouts. With the ability to accept both standard Double Open End and Single Open End cartridges, this housing will suit most applications where finer levels of filtration are required. Bolted closures are an option available for all models.

The 114 design will accept the full range of IFAB and industry standard cartridges with nominal lengths of 20, 30 and 40".

Key Product Features

- Split body design allows easy access to cartridges for filter changeout
