

Cartridge

IFAB CMIF

IFAB CMIF filter cartridges belong to the group of mechanical filters with a nominal filtration efficiency of 95%. They are used for removing suspensions, rust and solid sludge from liquids.

The cartridge fit perfect for applications where effective protection against such contaminants is required. They protect the equipment, installations, systems and fittings, prolonging their service life.

Standard End-caps (Special End-caps available)

(Double open-end)

Code 0 (2-222 O-Ring)

Code 7 (2-226 O-Ring + Fin)

Key Product Features

- Exceptional value for general applications where long life, high purity and low changeout frequency are required
- Meets food contact requirements
- 100% pure polypropylene construction
- Manufactured to be resistant to a wide range of chemical solutions

Long-life, low-cost, additive-free

Polypropylene

125 - 1016 mm

1 - 100

65 & 114 mm

2 Bar

80°C
