

Bag Filter Cartridge

IFAB BFC CARTRIDGE

The IFAB BFC are pleated cartridges designed for bag filter housing. This means high flow efficiency and long lasting service life.

The BFC combines the performance advantages of cartridge filters with the easy use of bag filter systems. It offers a unique combination of benefits regarding high flow filtration. Suitable for sea water desalination, drinking water, food & beverage, machinery and equipment.

The cartridge is available for both side inlet and over the top inlet. We offer a wide range of micron ratings in order to suit the requirements of the application.

Key Product Features

- High performance filter media
- Pleated configuration with high filtration area, more than 10 times the filtration area of a standard bag filter
- Large cartridge diameter suitable for high flow / high contaminant applications
- High mechanical strength
- Easily fitting to existing Size 1 and Size 2 housings
- The inside-to-outside fluid flow ensures the unwanted particles are trapped with the element

High flow efficiency

Polypropylene (PP)

Size 1 and Size 2

0,5 - 120

152mm

2,4 Bar

Max Temp 80°C
