

IFAB Boost Bag

IFAB Boost Bag is a super, oil-adsorbing bag, consisting of a polypropylene filter bag with a 2" center core.

The volume between center core and bag is stuffed with high efficiency poly micro fiber (spaghetti) The construction results in the ultimate solution for increased oil removal capacity with very low pressure drop

Suitable for oil and gel removal.

Key Product Features

- 850gr highly efficient melt-blown polypropylene 'spaghetti' fibers virtually traps two times its own weight
- Perforated spunbond cover layer keep all polypropylene 'spaghetti' fibers perfectly together inside the bag.
- Extruded polypropylene core stabilizes the filter element and allows a homogeneous and constant liquid flow from the inside to the outside

Melt-blown polypropylene

Ø 7" x 32" L (180 x 810 mm)

Diff.press 0,5 Bar

80°C

Flow rate 10m³/h
