

Cartridge Filter MELTBLOWN FILTER

IFAB Meltblown filter cartridges belong to the group of mechanical filters with a nominal filtration efficiency of 95%. They are used for removing suspensions, rust and solid sludge from liquids.

The cartridge fit perfect for applications where effective protection against such contaminants is required. They protect the equipment, installations, systems and fittings, prolonging their service life.

Standard End-caps (Special End-caps available)

CMIF	Media: Polypropylene Core: Polypropylene Max temp: 80°C Micron range: 1-200µm nominal Length: 5" - 40"
CMIE	Media: Polyester PBT Core: Polyester PBT Max temp: 120°C Micron range: 1-150µm nominal Length: 5" - 40"
CMIN	Media: Polyamide 6.6 Core: Polyamide 6.6 Max temp: 120°C Micron range: 1-150µm nominal Length: 5" - 40"

Long-life, low-cost, additive-free

PP, PE or PA

127 - 1016 mm

1 - 200

CMIF - 80°C
CMIE - 120°C
CMIN - 120°C

max 2 Bar
