

Cartridge Filter Housing

119 Design

The 'T' style configuration is ideally suited to small pilot scale or laboratory based processes for pressures up to 10 bar.

The 119 design Hygienic single cartridge housing is available for elements up to 30" long.

Base mounted, this free standing conventionally styled housing will suit processes where there is a need to allow easy access to all internal areas. This helps ensure the general cleanliness of the process system in which the filter is to operate.

Having no loose internal components ensures easy, fast sanitisations and clean down procedures.

The 119 design housing will accept the full range of IFAB Single Open End industry standard cartridges ranging from 0.03 to 40µm with nominal lengths of 10, 20 and 30".
