

Bag Filter Housing

206 Design SS304

The 206 bag housings are designed for use with the industry standard 7" ring style bags, widely used in today's process industries.

The top opening style is equipped with hinged and bolted closures for pressures up to 10 bar. The housing will accept the full range of IFAB and industry standard bags ranging from 1 to 1200µm.

The 206 design is infinitely flexible with adjustable legs and bottom outlet connection, making it ideal for batch applications, where free draining and frequent process changes take place.

Distinguished by its economy, high build quality and wide ranging options list, this housing can be used in almost all areas of the liquids processing industry.

Comes with pressure gauge, ball valve, and air vent as a standard.

Key Product Features

- 304 stainless steel
- Robust bag support basket assembly fabricated from perforated sheet rather than wire mesh for extra strength
- Bolted style closures
- Comes with pressure gauge, ball valve, and air vent as standard.
- Each housing hydrostatically pressure tested
- PED Compliant

Universal product

304 St. Steel

10 Bar

-10 - 110°C
