

With Vee clamp closure

With bolted closure

Bag Filter Housing

206 Design

The 206 bag housings are designed for use with the industry standard 7" ring style bags, widely used in today's process industries.

The top opening style is equipped with a Cast Vee clamp as standard with the option of Rathmann style hinged and bolted closures for pressures up to 16 Bar. The housing will accept the full range of IFAB and industry standard bags.

The 206 design is infinitely flexible with adjustable legs and bottom outlet connection, making it ideal for batch applications, where free draining and frequent process changes take place.

Distinguished by its economy, high build quality and wide ranging options list, this housing can be used in almost all areas of the liquids processing industry.

Key Product Features

- Positive bag seating mechanism to minimise risk of seal bypass
- Robust bag support basket assembly fabricated from perforated sheet rather than wire mesh for extra strength
- Internally and externally electropolished as standard
- Wide range of options available for connection sizes and types and materials of construction
- Vee clamp or hinged and bolted style closures
- Conventional dished end to aid clean down
- Each housing hydrostatically pressure tested
- PED and ATEX Compliant
