

Oil-adsorbing filter bags

BPOMF 1 - 100 my

Oil-adsorbent filter bag made out of polymicro fiber.

The microfiber filter bag provides outstanding performance on contaminant applications where minimizing particle travel is important.

The bag contains two layers:
 - A pre-filtering layer that removes coarse debris
 - An outer welded filterbag giving the final partial removal efficiency, preventing any fibers getting in the systems.

Ideal for chemical and coating applications.

Key Product Features

- Polypropylene, double layer construction adsorbs hydrocarbons from air, gas and aqueous streams for clearer results.
- Outer cover prevents fiber migration to reduce waste.
- Non-foaming microfiber offers product cleanliness, high performance and longer service life.
- High void volume means longer service life, higher contaminant loading and reduced waste loads.
- Easy change-out reduces down time.

Oil-adsorbent

1 2 3 4

1-100 micron + OA
 (OA includes an additional layer of nylon to prevent fiber release)

1.5 Bar

Polypropylene 80°C
